What the app can and can't see

Dashboard: where you stand overall

Groups at a glance

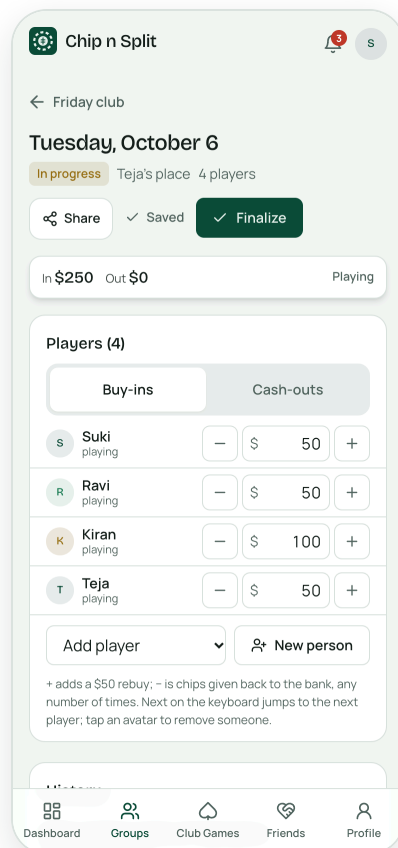

A poker night in progress

FEATURE 1

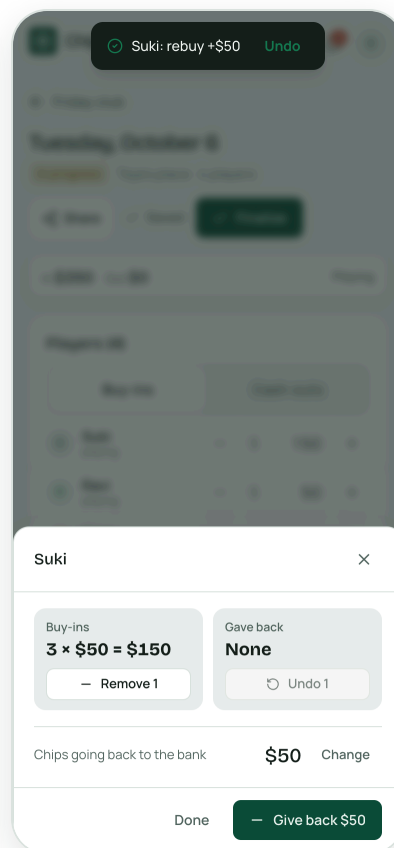

Poker nights, start to finish

Built for entering a whole table on a phone, while the game is happening.

- Start a game with the club's regulars; the buy-in per player is required, so nobody plays on a stale amount.
- + adds a rebuy in one tap; – opens the player's panel: buy-ins ($3 \times \$50 = \150), chips given back, and one-tap fixes.
- Every tap shows an **Undo**, so a mistaken + is fixed without padding anyone's numbers.
- Cash-outs when the table breaks; a live table check makes sure money in equals money out.
- Finalize to get the fewest payments; tick each one off as **Paid**. Only the game's host can change it; everyone else follows live.
- Any member can start a game. Deleted a game by mistake? The host can **Restore** it, payments and all, from the club's History tab.

Buy-ins with – / + per player

Player panel: counts, Remove 1, Undo 1

FEATURE 2

Expenses, Splitwise-style

Trips, rent and dinners, in a group or just between two friends.

- Short by default: what, how much, who paid, split equally or one person owes all.
- **More options:** several payers, split by shares, exact amounts, or percentages, always to the exact cent.
- **One-on-one** expenses with a friend need no group, and can be in **USD, INR, or GBP**; each currency keeps its own balance, never converted.
- Anyone in the group can add, edit, or delete an expense, and bring a deleted one back from History.
- Import a spreadsheet (Excel or CSV).

The 'Add an expense' form is displayed over a blurred background of the app's main interface. It includes the following fields and options:

- What was it for?**: A text input field containing 'Pizza and drinks'.
- Amount**: A numeric input field with a dollar sign and '0.00'.
- Today - Change date**: A date selector.
- Currency**: Three buttons labeled 'USD' (selected), 'INR', and 'GBP'.
- Paid by**: A dropdown menu with 'Suki' selected and a 'Several people' button.
- Split**: Four tabs labeled 'Equally' (selected), 'Shares', 'Exact amounts', and 'Percent'.
- Split list**: Two entries showing 'S Suki' and 'V Vamsi', each with a checkmark and '\$0'.
- Buttons**: 'Cancel' and 'Add expense' at the bottom.

More options: currency, payers, split modes

The 'Goa trip' expense group page shows the following details:

- Header**: 'Chip n Split' logo, a notification bell with '3', and a user profile icon 'S'.
- Back Arrow**: A left-pointing arrow labeled 'Groups'.
- Group Name**: 'Goa trip'.
- Summary**: 'Expenses 4 people You are owed \$237.50'.
- Actions**: 'Share', 'Import', and 'Expense' buttons.
- Tabs**: 'Balances' (selected), 'Expenses', 'Members', and 'History'.
- Settle up**: A section titled 'Fewest payments to clear it all.' with a 'Share' button. It lists three payments: 'V Vamsi → Suki \$122.50', 'R Ravi → Suki \$82.50', and 'K Kiran → Suki \$32.50'.
- Where everyone stands**: A section showing individual balances: 'S Suki gets back \$237.50' and 'K Kiran owes \$32.50'.
- Bottom Navigation Bar**: Icons for 'Dashboard', 'Groups' (selected), 'Club Games', 'Friends', and 'Profile'.

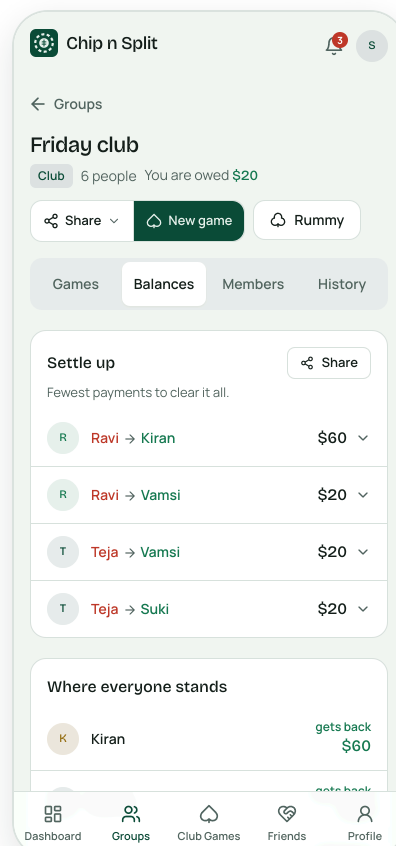

An expenses group

FEATURE 3

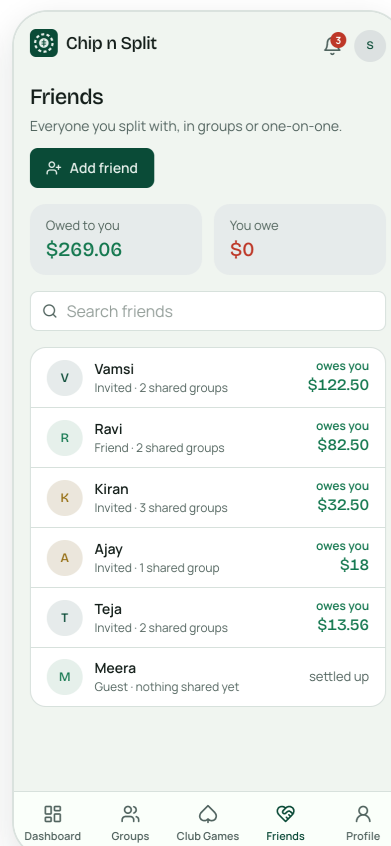

Balances you can trust

One number per person, adding up games, expenses, and payments, with the rules enforced by the database.

- Dashboard: **overall, you're up / you owe**, with **You get** and **You pay** at a glance.
- Each friend's balance across every group and one-on-one, **biggest amount first** whether you're owed or you owe (green owes you, red you owe), settled-up friends last. The Dashboard lists groups the same way.
- Every group's **Balances** tab: the fewest payments to clear it all, record a payment in one tap, remind someone by email.
- Settled-up people are tucked away; groups and games can't be deleted while money is still owed.

Settle up and where everyone stands

Friends, across all groups

FEATURE 4

Share images & summaries

Clean, color-coded pictures to drop into a group chat, made right in the app. Green is up, red is down.

- **Game in progress:** buy-ins, give-backs, cash-outs, and the pot on the table.
- **Finished game:** every player's net, winners first, then who pays whom with **Paid ✓** marks.
- **Group balances** as of today, and the club **leaderboard**. Big groups split into two phone-shaped pictures.
- **Email summary** and one-person **reminders** open pre-filled in your own mail app.

FEATURE 5

Leaderboard & rummy

Bragging rights, kept honest.

- Each club's **leaderboard**: all-time won or lost at the table, games played, nights won, best night. (Table results, not who owes what now.)
- **Club Games** lists only the poker nights you actually played, across all your clubs, with your totals.
- **Pool rummy** scored hand by hand: out at 101, 151, or 201; optional buy-in and rejoin; the payout is worked out for you and can be added to the club's balances.

A club: games list, leaderboard below

Friday club					
All-time leaderboard · Oct 7, 2026					
#	Player	Games	Won	Best	Total
1	Suki	6	3	+\$130	+\$250
2	Kiran	5	3	+\$60	+\$100
3	Ravi	5	3	+\$80	+\$50
4	Vamsi	3	2	+\$40	+\$50
5	Teja	3	0	-	-\$120
6	Ajay	6	1	+\$50	-\$330

FEATURE 6

Friends

Everyone you split with, in one list, whether you met them in a group or one-on-one.

- **Add a friend** in one short form: **With email** (name + their Google email, so they're linked when they sign in) or **Guest, no email** (just a name).
- Each friend shows what you share: **2 shared groups**, **one-on-one**, or **nothing shared yet**.
- A friend's page adds up your one-on-one expenses into one **Balance** per currency, plus your balance in each shared group, each with **Settle**.
- **Remove friend** works for anyone (friend, invited, or guest), but only once you're settled up. They come back on their own if a balance with them opens again.

The 'Add a friend' modal is shown over a blurred background of the app's main interface. It has a title bar with 'Add a friend' and a close button. Below the title bar are two tabs: 'With email' (selected) and 'Guest, no email'. Under the 'With email' tab, there are two input fields: 'Name' with the value 'Ravi' and 'Google email' with the value 'ravi@gmail.com'. Below these fields is a small note: 'They see balances once they sign in with it.' At the bottom of the modal are two buttons: 'Cancel' and 'Add friend'.

Add a friend: with email or as a guest

The 'Friends' page for a user named 'Vamsi' is shown. At the top, there's a header with 'Chip n Split' and a notification icon. Below the header is a back arrow and the title 'Friends'. The main content area shows a card for 'Vamsi' with a profile picture, name, and email. Below this card is a section 'Owes you' showing a balance of '\$122.50' and an 'Add expense' button. Below that is a section 'Just you two' with a description: 'Expenses you add here stay between you and Vamsi, outside any group.' Below this is a section 'In groups' with two items: 'Friday club' (settled up) and 'Goa trip' (owes you \$122.50, with a 'Settle' button). At the bottom of the main content area is a 'Remove friend' button with a warning message: 'Settle up with Vamsi before removing them.' The bottom navigation bar has five icons: Dashboard, Groups, Club Games, Friends (selected), and Profile.

Remove friend waits until you're settled

FEATURE 7

Who can do what

Simple roles, checked by the database itself, so they hold even if someone tries to get around the app.

Every member

Add, edit, delete, and restore expenses. Start games. Record payments. Add people.

A game's host

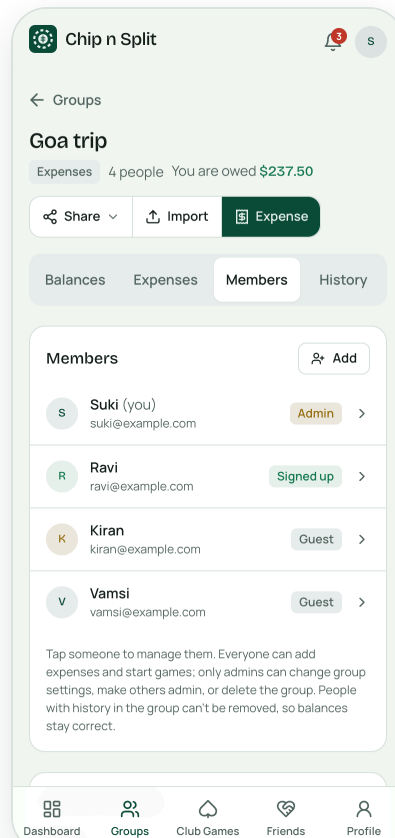

Whoever started the game runs it: buy-ins, cash-outs, finalize, mark paid, delete or restore it.

Group admins

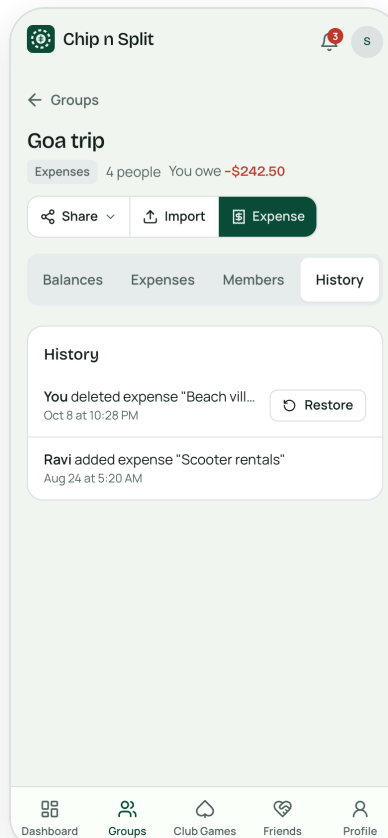

The group's creator, plus anyone they make admin. Change settings, make others admin, delete the group.

Delete safely

A group or a finished game can't be deleted until it's settled up. Deleted expenses and games can be restored.

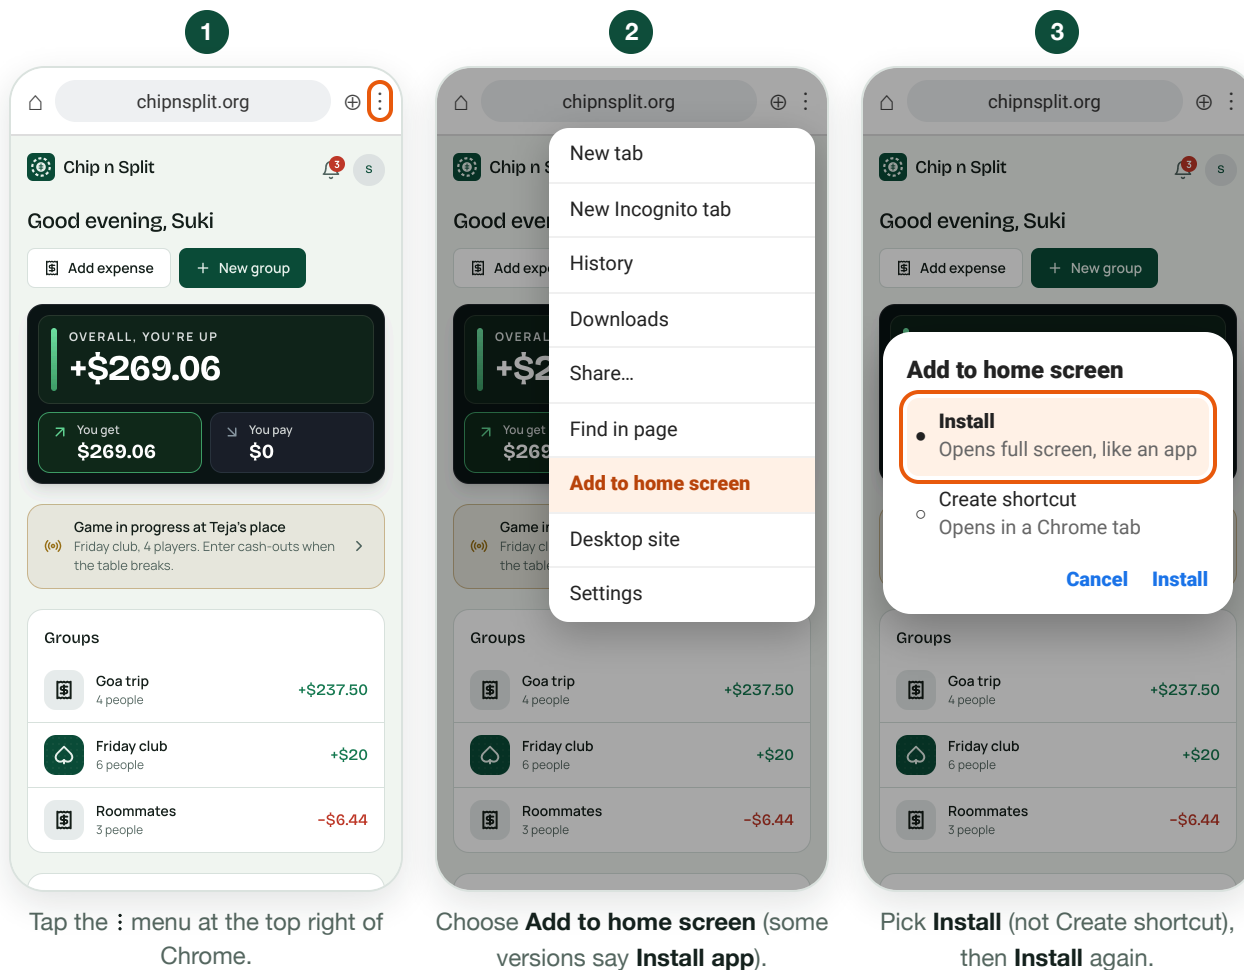

Members: the creator is Admin

History: Restore a deleted item

Install on Android (Chrome)

Chip n Split installs like an app: its own icon, full screen, no app store. Open **chipnsplit.org** in Chrome, then:

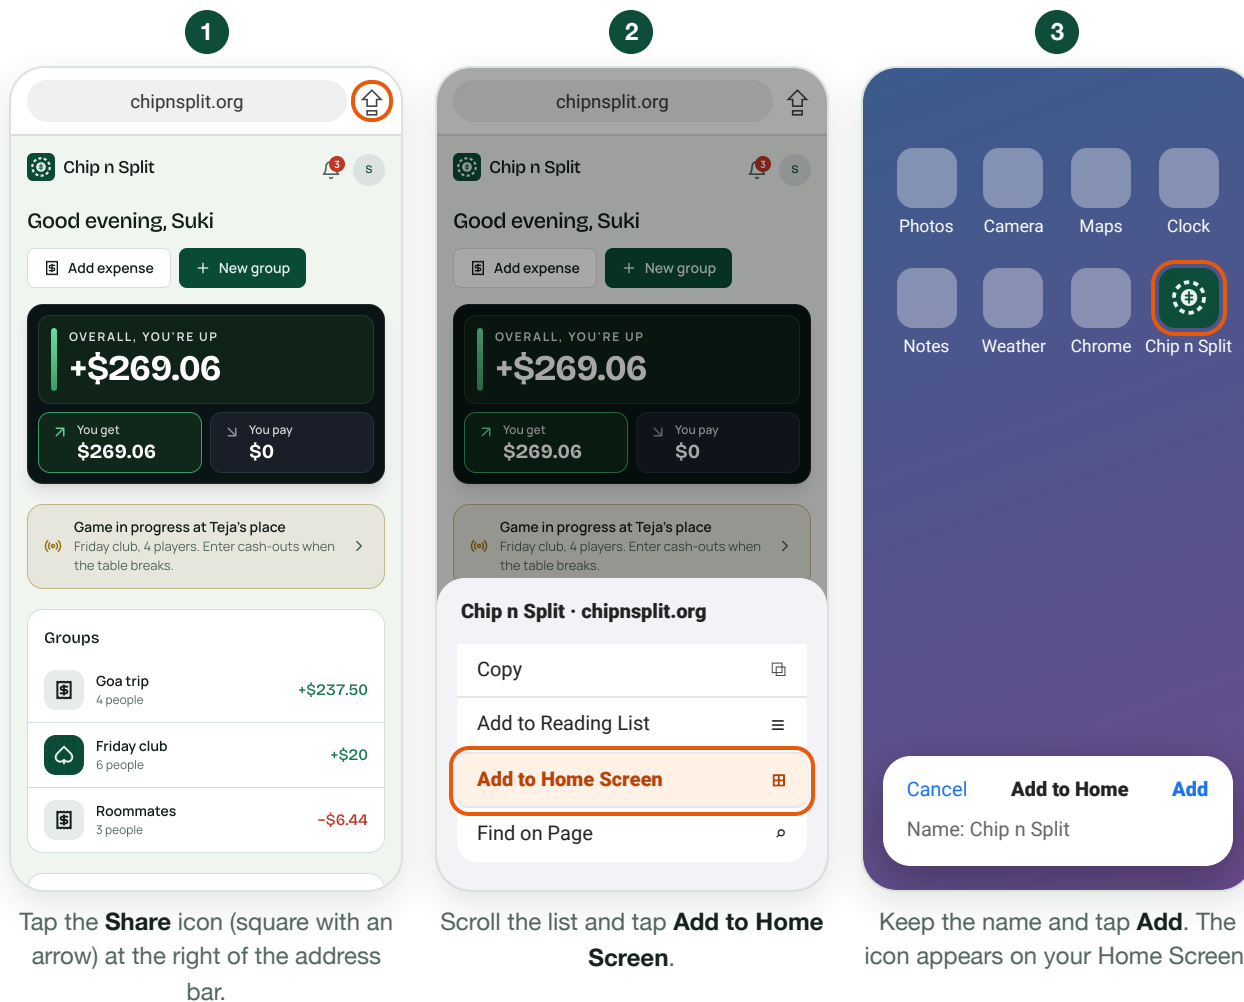

The **Chip n Split** icon lands on your home screen and in the app drawer. It opens full screen, signs you in once, and updates itself. To remove it: long-press the icon → **Uninstall**. Chose **Create shortcut** by mistake? Delete that icon and install again.

Illustrations of Chrome's own menus. Exact wording varies a little between Chrome versions.

Install on iPhone (Chrome)

On iPhone, Chrome adds it to the Home Screen from the Share button (iOS 16.4 or later).
Open **chipnsplit.org** in Chrome, then:

Using **Safari** instead? Same steps: the **Share** button at the bottom → **Add to Home Screen** → **Add**. Opened from the icon, it runs full screen like an app. To remove it: long-press the icon → **Remove App** → **Delete from Home Screen**.

Illustrations of Chrome's and iOS's own screens. Exact wording varies a little between versions.

SECURITY

Signing in with Google

Chip n Split never sees or stores a password. Google does the sign-in, on Google's own page.

Tap "Continue with Google"

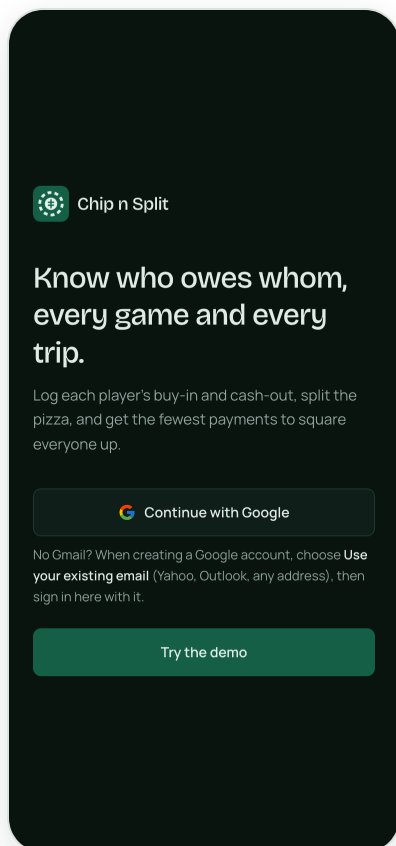

Google's sign-in page

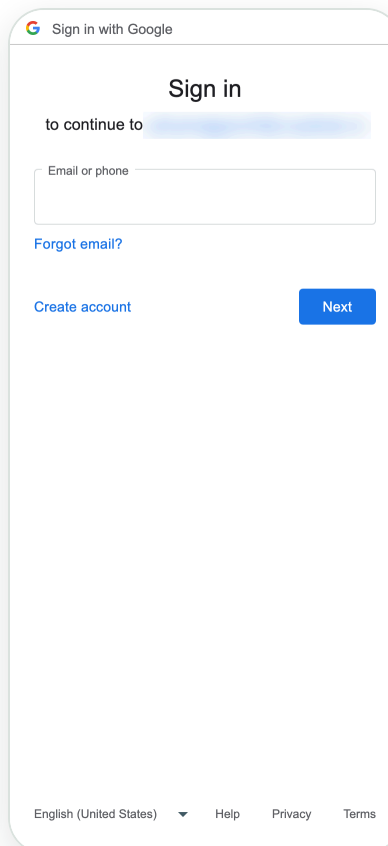

Google confirms it's you

You're in

The app's sign-in screen

Google's own page (accounts.google.com)

No passwords, ever

Your password and 2-step verification stay with Google. The app only gets Google's confirmation.

Only name, email, photo

No access to Gmail, Drive, contacts, or anything else in your Google account.

Private to your groups

The database itself checks every request: you only see groups you belong to.

Encrypted, and revocable

HTTPS everywhere. Remove the app anytime: Google Account → Security → Third-party apps.

No money moves through the app and no bank details are stored; it only records who owes whom. No Gmail? Create a Google account with your existing email (Yahoo, Outlook, ...) and sign in with that.
